### **DETAILED ACTION**

The following is a first action on the merits of application serial no. 10/805,561 filed on March 22, 2004.

#### ***Election/Restrictions***

Claims 5-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 18, 2005.

#### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Information Disclosure Statement***

The information disclosure statement filed on March 22, 2004 has been acknowledged.

#### ***Claim Objections***

Claim 4 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

Claim 3 is objected to because of the following informalities:

-“claim” should be changed to -claims-.

Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 00/25041 in view of Watanabe et al ('552). WO discloses a hydraulic drive vehicle having a hydraulic transmission (40), an electronic actuator (121, 122) changing an input/output ratio of the transmission, a differential (7) combining the input and output side of the transmission and the actuator being controlled by a feedback method.

The WO reference does not disclose calculating a difference for a value of the actuator.

Watanabe et al discloses a hydraulic system having an actuator (1a) for changing an output of the system wherein when a load is not applied (neutral point), a command value ( $Y_0$ ) for the actuator is memorized (store in RAM) and a difference is calculated ( $\Delta Y$ ) between an actual command value ( $Y$ ) and the memorized value in which the memorized value is compensated (column 6, lines 36-42).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to provide the transmission control of the WO reference with a calculating section for the actuator in view of Watanabe to accurately detect the position of the actuator during shifting of the vehicle.

### FACSIMILE TRANSMISSION

Submission of your response by facsimile transmission is encouraged. Group 3600's facsimile number is **(703) 872-9326 before final and 703-872-9327 after final**. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see MPEP 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check **should not be** submitting by facsimile transmission separately from the check.

Responses submitted by facsimile transmission should include a Certificate of Transmission (MPEP 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to  
the Patent and Trademark Office (Fax No. (703) 000-0000) on \_\_\_\_\_ (Date)

Typed or printed name of person signing this certificate:

\_\_\_\_\_

\_\_\_\_\_

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and MPEP 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

-Lee et al ('219), Ishino et al ('137), Narita et al ('490), Izumi et al ('313), JP 02199367A and JP 05177679A.
